

# Bugs

By Vincent Davis

Bugs move around like little robots

Are you afraid of them?  
kill them  
they don't really care  
individuals do not matter  
in the bug world  
the whole is always greater than the few

keep killing them  
you need to

Don't you?

because they're in your space  
and they're ugly  
dirty  
and always hungry  
they're everywhere

they're inside you

eventually they will take you over  
and deep down you know it

Does it make you uncomfortable?

they don't care  
it's in their DNA to not care  
and they are predestined to be the great survivors of this planet

we on the other hand  
are quite another story.
